Metabolomics

Over the past few years, the market for metabolomics has increased dramatically, with LC/MS and other technologies leading the charge in the areas of biomarker discovery, phenotyping, toxicology and clinical/ diagnostics research. Demand for instruments continues to be robust, particularly with metabolomics scientists perpetually seeking next generation technologies and methods. This report on metabolomics uncovers the new challenges and opportunities of the market for the next five years.

Information You Can Trust

Metabolomics 2018

Market Forecast, 2017-2022

Table of Contents

I. Introduction

- A. Report Objectives
- B. Methodology
- C. Sources of Information
- D. Market Size and Forecast Estimates
- E. Market Scope

II. Executive Summary

III. Metabolomics Benchmarks

- A. NIH Metabolomics Grants from 2000–2017
- B. A Count of NCBI Publications with “Metabolomics”
- C. Targeted, Untargeted, Profiling, Fingerprinting, Footprinting Etc.
- D. Number of Metabolomics Labs
- E. Installed-base of Instruments

IV. End-User Survey

- A. Demographics
- B. Technology Usage
- C. Untargeted vs Targeted Metabolomics
- D. Molecule Types and Analytes
- E. Metabolomics Research Focus

F. Vendor Usage

G. Future Plans and Troubleshooting

H. Trends

V. Market Demand

- A. Overall
- B. Demand by Technology Type
- C. Demand by Application Focus
- D. Demand by Region
- E. Demand by Industry Segment

VI. Competitive Landscape

- A. Collaborations, Initiatives, Other Deals
- B. Current Products on the Market
- C. Product Introductions

VII. Strategic Perspectives

- A. Market Drivers
- B. Market Restraints
- C. Challenges
- D. Opportunities

VIII. Corporate Profiles
