

# 2017 Laboratory Enclosures & Furniture Market Report

2016 Market Size → \$1.4 Billion

The total market for laboratory enclosures and furniture was measured at \$1.4 billion in 2016. Despite some challenges from economic uncertainties, the market is expected to generate solid growth for the long-term, stemming from a healthy mix of new laboratory construction, lab expansions, and product replacement.

**The market estimates in this report were derived from an in-depth market survey of laboratory enclosure and furniture manufacturers, in addition to an extensive secondary research, making it the most accurate market report on the topic available.**

# Laboratory Enclosures and Furniture

Market Forecast, 2016-2022

## Here's what you'll find

1. Overall Lab Enclosures & Furniture Market
2. Laminar Flow and Biological Safety Cabinets
3. Fume Hoods
4. Laboratory Furniture
5. Laboratory Planning and Architecture
6. Laboratory Enclosures and Furniture Market Survey

The Overall Lab Enclosures & Furniture Market section combines all of the product categories covered in this report and presents the data as a whole. The totals are presented by product type, followed by the overall regional and individual regions, industry/sector, and the combined competitive demand.

Each of the product parts that follows (laminar flow and biological safety cabinets, fume hoods, and lab furniture) begins with an overview, followed by a quick snapshot of the market, and then a dive into detailed product, region, industry/sector, and competitive analysis. In the Laboratory Planning and Architecture section, only the competitive landscape is presented.

The last section of the survey is dedicated to our 2017 laboratory equipment manufacturer market survey, the results of which are presented in aggregate. No confidential or company identifying information is presented.
